

LEICA MICROSYSTEMS IN PARTNERSHIP WITH ROVERS POLSKA SP. Z O.O. FOR IVF IN POLAND

Leica Microsystems are pleased to announce their partnership with Rovers in Poland, working together to provide complete integrated solutions for IVF that will enable you to take your IVF centre to a new level.

Rovers is a leading distributor in Poland in the field of cervical cancer detection and is able to offer a full range of medical products for daily gynecological practice. They have simultaneously developed their offering into in-vitro fertilization media, medical devices, and equipment, and are the partner of choice to strengthen our IVF offering in Poland through:

- > Higher efficiency for IVF workflows through better training, workshops and after-sales support
- > A wider product portfolio, completely integrated to suit the required solution, from microscopes to accessories and consumables

For more informations on IVF solutions from Leica Microsystems, visit www.leica-microsystems.com
